Professional Summary

Computer Science and Engineering student (B.Tech, expected 2027) with hands-on experience in full-stack development and AI-powered applications. Experienced in building and deploying web applications integrating modern technologies and data-driven solutions. Seeking Software Engineer / Full-Stack Developer opportunities to build software products.

Education

Vishnu Institute of Technology **2023 – 2027**
Bachelor of Technology in Computer Science and Engineering (CGPA: 8.5/10.00) *Bhimavaram, Andhra Pradesh*

Sasi Junior College **2021 – 2023**
Intermediate(MPC)(Percentage: 98.1%) *Mandapeta, Andhra Pradesh*

Sasi E.M School **2020 – 2021**
Secondary School Certificate (SSC)(Percentage: 95%) *Mandapeta, Andhra Pradesh*

Experience

SmartBridge **Jun 2026 – Jul 2026**
Full-Stack MERN Virtual Intern *Remote*

- Developed a responsive MERN stock trading platform with 5+ core modules, including live market dashboards, search, simulated buy/sell processing, and portfolio analytics.
- Implemented JWT-based session management, CORS-secured RESTful APIs, and route-level role protection while collaborating within a 5-member Agile team to integrate frontend components with backend controllers.

AICTE **Jul 2024 – Sep 2024**
Alteryx Virtual Intern *Remote*

- Created and executed 5+ Alteryx workflows to clean, merge, and analyze structured Excel/CSV datasets, improving processing speed by 40% compared with manual methods.
- Automated repetitive data preparation tasks such as missing-value handling, column standardization, and file merging, saving 2–3 hours of manual effort per dataset.

Projects

AI Floor Plan to 3D Visualizer | *React, Vite, TypeScript, Tailwind CSS, Puter AI, Vercel* | GitHub **Mar 2026**

- Architected a web application using React, TypeScript, and Tailwind CSS that converts 2D room sketches into photorealistic 3D interior renders through Puter AI.
- Deployed the application on Vercel and evaluated 40+ generated designs to improve prompt accuracy and visual quality.

Fake Product Review Detector | *Python, Scikit-learn, NLTK, TF-IDF, SVM* | GitHub **May 2026**

- Developed an NLP-based classification system to detect computer-generated and original product reviews using TF-IDF feature extraction and multiple machine learning models.
- Evaluated Random Forest, SVM, and Logistic Regression, achieving 88.11% accuracy with SVM on the test set.

Startup Pitch & Discovery Platform | *React, Next.js 15, Tailwind CSS v4, Sanity, Vercel* | GitHub **Apr 2025**

- Built a collaborative startup discovery platform using Next.js 15, React, Tailwind CSS v4, and Sanity CMS, supporting 50+ submissions across multiple categories and boosting user engagement by 30%.
- Engineered real-time content rendering through Sanity CMS APIs, reducing content update latency to 200 ms and deploying the application on Vercel for production delivery.

Achievements

Smart India Hackathon: Developed an educational website concept and presented the idea as part of a 5-member team.
24-Hour Failathon: Developed and presented an innovative solution as part of a 4-member team within 24 hours.

Technical Skills

Languages: Java, Python, JavaScript, HTML/CSS, SQL
Frameworks/Libraries: React.js, Next.js, Bootstrap, Tailwind CSS
Tools: Git, GitHub, VS Code, Postman, Docker

Certificates

Udemy – Full-Stack Web Development (Jun 2025)
IBM – Getting Started with Data (May 2025)
Alteryx – Designer Core Certification (Sep 2024)
Google – Prompt Design in Vertex AI (Sep 2024)
