Professional Summary

Computer Science and Engineering student (B.Tech, expected 2027) with hands-on experience in Full-Stack Development and Generative AI. Skilled in Java, Python, JavaScript, and SQL, with experience building AI-powered applications using LLMs, AI agents, and API integrations, seeking Software Engineer / Full-Stack Developer roles to build scalable software products.

Education

Vishnu Institute of Technology **2023 – 2027**
Bachelor of Technology in Computer Science and Engineering (CGPA: 8.5/10.00) *Bhimavaram, Andhra Pradesh*

Sasi Junior College **2021 – 2023**
Intermediate(MPC)(Percentage: 98.1%) *Mandapeta, Andhra Pradesh*

Sasi E.M School **2020 – 2021**
Secondary School Certificate (SSC)(Percentage: 95%) *Mandapeta, Andhra Pradesh*

Experience

SmartBridge **Jun 2026 – Jul 2026**
Full-Stack MERN Virtual Intern *Remote*

- Developed a responsive MERN stock trading platform with market dashboards, stock search, simulated trading, and portfolio analytics using React, Node.js, Express, and MongoDB.
- Implemented JWT authentication, CORS-secured REST APIs, and role-based route protection in Express.
- Collaborated with a 5-member Agile team to integrate frontend components with backend controllers.

AICTE **Jul 2024 – Sep 2024**
Alteryx Virtual Intern *Remote*

- Created 5+ Alteryx workflows to clean, merge, and analyze structured Excel and CSV datasets.
- Automated data preparation tasks, including missing-value handling, column standardization, and file merging.
- Reduced manual processing time by 40% and saved an estimated 2–3 hours per dataset.

Projects

AI-Based Maps and Navigation Assistant | *Python, Google ADK, Gemini, Maps API, Render* | GitHub **Jun 2026**

- Built an AI-powered maps assistant using natural-language queries to identify relevant places based on user preferences and requirements.
- Integrated Google Maps Places API and Routes API to retrieve location details and provide route information, including distances, estimated travel times, and navigation instructions.

AI Floor Plan to 3D Visualizer | *React, Vite, TypeScript, Tailwind CSS, Puter AI, Vercel* | GitHub **Mar 2026**

- Architected a web application using React, TypeScript, and Tailwind CSS that converts 2D room sketches into photorealistic 3D interior renders through Puter AI.
- Deployed the application on Vercel and evaluated 40+ generated designs to improve prompt accuracy and visual quality.

Startup Pitch & Discovery Platform | *React, Next.js 15, Tailwind CSS v4, Sanity, Vercel* | GitHub **Apr 2025**

- Built a collaborative startup discovery platform using Next.js 15, React, Tailwind CSS v4, and Sanity CMS, supporting 50+ submissions across multiple categories and boosting user engagement by 30%.
- Engineered real-time content rendering through Sanity CMS APIs, reducing content update latency to 200 ms and deploying the application on Vercel for production delivery.

Achievements

Smart India Hackathon: Developed and presented an educational website concept as part of a 5-member team.
24-Hour Failathon: Collaborated in a 4-member team to develop and present a solution within 24 hours.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL, HTML/CSS
Frameworks and Libraries: React.js, Next.js, Bootstrap, Tailwind CSS
Tools and Platforms: Git, GitHub, VS Code, Postman, Docker

Certificates

Udemy – Full-Stack Web Development (Jun 2025)
IBM – Getting Started with Data (May 2025)
Alteryx – Designer Core Certification (Sep 2024)
Google – Prompt Design in Vertex AI (Sep 2024)
